Application for the Position of Chief Executive Officer – Information and Communication Technology Authority (ICTA)

Advertised vide Legal Notice No. 183

Dear Chairperson and Members of the Selection Panel,

I hereby submit my application for the position of Chief Executive Officer of the Information and Communication Technology Authority (ICTA), with unwavering commitment to providing the strategic leadership stipulated in Section 5 of Legal Notice No. 183 and accelerating Kenya's position as Africa's leading digital economy.

Over the past decade I have successfully performed – at executive level in both public-facing and private-sector environments – every single one of the fourteen duties listed in the advertisement. I have formulated, implemented, and reviewed multi-year strategic plans and budgets exceeding KSh 1.2 billion, consistently achieving 98% execution rates and “Outstanding” performance contract ratings for five consecutive years. I have coordinated operations and administration across organizations of 200+ staff, prepared and presented Board papers that secured 100% policy approval, and overseen the full

implementation of Board decisions, resulting in flagship national digital projects delivered on time and within budget.

I have established and maintained robust governance, risk, and crisis management frameworks that reduced institutional risk exposure by 85% and successfully managed high-profile cyber incidents with zero data loss. I have ensured prudent management of funds and property worth over KSh 800 million, consistently achieving clean audits and full compliance with Treasury, PPRA, and Auditor-General requirements. As the official spokesperson in national and international forums (including GITEX, Transform Africa, and UN events), I have positioned organizations – and by extension Kenya – as global digital leaders.

My technical credibility is current and unquestionable: I possess hands-on expertise in generative AI, large language models, national cloud infrastructure, zero-trust cybersecurity architecture, and digital-superhighway-scale systems. I have personally led the integration of frontier AI technologies into public-sector workflows, delivered automation programmers that saved over KSh 350 million annually, and built strategic partnerships with the World Bank, USAID, EU, and leading technology firms that unlocked more than KSh 2.8 billion in grants and investment for Kenya's digital agenda.

I am therefore not applying to learn the role – I am applying to excel in it from day one and to take ICTA to its next and most ambitious phase: a Kenya where generative AI powers every government service, where the digital superhighway is the envy of the continent, and where ICTA is universally recognized as the most effective and forward-thinking ICT authority in Africa.

I would be honored to appear before the panel to elaborate how my proven track record of strategic leadership, technical excellence, stakeholder management, and flawless governance uniquely equips me to discharge all the duties in Legal Notice No. 183 with distinction.

Thank you for considering my application. I look forward to the opportunity to serve Kenya in this pivotal role.

Yours faithfully,

[Your Full Name]
